

2017-2018 ANNUAL REPORT

We are so grateful for a wonderful year as we extended our REACH into our community through our Four Pillars.

Our Four Pillars synergistically enable us to serve and love in and around our public schools. Making this all work are our amazing volunteers, who join us in the schools, at the Jubilee REACH Center, the Jubilee REACH Thrift Store, and at Community Building Events.

Although the numbers in this Annual Report illustrate the impact of loving unconditionally, the most important number remains at ONE. Jubilee REACH loves the one who is the lost, the least, the lonely, the left behind; the one who needs love the most but expresses it in the most unloving ways. Love transforms lives, futures, families, our culture, our schools, and our community.

Our currency is unconditional love. Our core is building relationships and earning trust, and our call is to "Love Our Neighbor". As we do this, we have been privileged to witness the radical transformation in the behaviors, academic achievement, and futures of students once they believe they are loved and feel they belong to a caring community through sports, clubs, and activities within their schools.

We give thanks to YOU. Your love, support, service, and advocacy inspire and sustain us.

BELONG

Big Picture Middle School was about to lose its 4th consecutive football game. There was time enough for one final play. "I just want to run. Can I have the ball just this one time?" Austin, a 6th grader had never had an opportunity to touch the football. "Sure," said Justin, the 8th grade quarterback as he shrugged. As Justin handed the ball off to Austin, the entire sideline erupted. Austin streaked downfield, quick stepping around defenders. His teammates blocked as they tried to keep up with him. Parents screamed. Friends yelled their encouragement, "Go Austin, go!" And he did! 55 yards into the end zone where he was quickly swarmed with hugs from shrieking friends; family and fans jostling, jumping with joy.

Although, Big Picture lost that game, and every game that year, something greater happened. Austin's mom best summarized it best as he received the "Jubilee Character Award" at Big Picture's end of season celebration. Emotionally she told Big Picture Site Coach Jakeh Nelson, "Every day Austin comes home happy, even after losing a game. He's out there having fun playing, and being a kid. The pressure to perform is gone. You make it about being part of a team about sportsmanship, about belonging."

Austin's team of diverse friends wanted to continue "playing." However, the next Jubilee REACH Sports season was basketball, and not all of Austin teammates knew how to play basketball. That didn't stop them though as Austin and the rest of the Big Picture football team became a part of the school's first basketball team. Over 20 kids had a place to play, belong, and be in community.

Every day, lives such as Austin's are being changed. With your support and prayers, more students and families can pursue their passions and realize their full potential.

"As a single mom, it is difficult to afford other after-school programs, but Jubilee REACH has been the god-send needed for my son. Knowing he's in an environment that I can trust and know he's having a great time in, relieves the guilt and stress of having to work and not being there for my son after-school."

-Bellevue Public School Parent

"Serving breakfast at Jubilee REACH is the sunny sideup in my world. From the time walk through those doors and give Barb, Hospitality Manager, a morning hug until the time I need to leave and hear twenty children sing thank you – it's a heart motivating hour and a half I wouldn't trade for anything – not even an extra hour of sleep."

*- Wendy Cummings,
Jubilee REACH Volunteer*

"Only by serving as a volunteer ESL teacher, did I realize just how much love I had to give. My life of hidden pain and emptiness was now full of joy and hope for good. I found through loving people from all over the world by teaching English, that we are all the same, no matter where we come from. We all want to love and to be loved."
